The Living *Trace*

From a single human testimony to a constellation of cultural memory.

ONE VOICE. MANY CONNECTIONS.
NO LOSS OF ORIGIN.

THE DESIGN THESIS

The mission should *generate the interface.*

Not illustration inspired by the work. A coherent system of visual behaviors that expresses human origin, relationships, authority, plurality and continuity.

- **BEAUTY WITH A FUNCTION**
  Every major visual clarifies meaning or action.
- **RIGOR WITHOUT COLDNESS**
  Provenance and permission are legible, humane systems.
- **WONDER WITHOUT EXTRACTION**
  Discovery never overrides source or community authority.

ONE SOURCE, MANY RESPONSIBILITIES

01 **HUMAN TESTIMONY**
Person, voice, lived experience

02 **RECORD & CONTEXT**
Language, time, annotation

03 **PROVENANCE**
How we know what we know

04 **COMMUNITY AUTHORITY**
Consent, access, withdrawal

05 **CONTINUITY**
Preservation over generations

A SMALL, SEMANTIC VOCABULARY

Six primitives. One grammar.

01

ORIGIN

The human or documentary source.

02

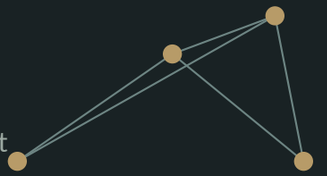

TRACE

A typed, evidence-linked relationship.

03

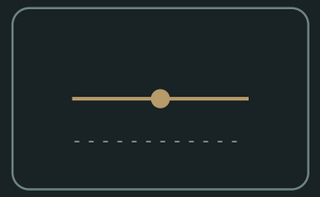

CONSTELLATION

Plural records; navigable, not merged.

04

BOUNDARY

Community permissions, including absence.

05

TIME

Versions, continuity and change.

06

VOICE

Human presence, never wallpaper.

PROPOSED HOMEPAGE CADENCE

An encounter, not a brochure.

A deliberate emotional arc; every movement must support fast navigation, usable content, and an equally complete no-motion version.

00

ENCOUNTER

Curiosity

01

WITNESS

Empathy

02

PRESERVE

Confidence

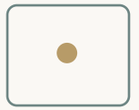

03

DISCOVER

Wonder

04

RESPECT

Trust

05

PROOF A / THE ORIGIN

Every memory *begins somewhere.*

There is enlightenment in exploration,
but empathy is essential.

EXPLORE THE MISSION

ORIGIN / 001

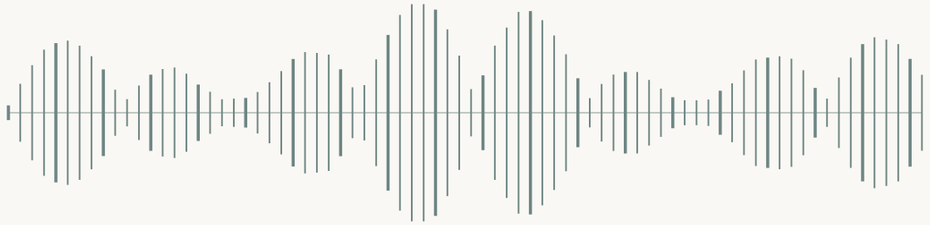

01 / WITNESS

Before a record, *there is a person.*

Never abstract the human source into mere data. Testimony carries a voice, circumstances, permission, and responsibility.

HUMANITY BEFORE THE DATABASE

ILLUSTRATIVE COMPONENT - NOT A REAL RECORD

SOURCE CONTEXT

A voice can be heard, read, contextualized - or withheld by its rights authority.

TEXT VERSION

ACCESS NOTES

02 / PRESERVE

A memory, with its context intact.

DEMONSTRATION ONLY / SYNTHETIC SCHEMA STUDY

MEMORY RECORD / DEMO-0001

DEMO ONLY

Human source, clearly identified.

03 / DISCOVER

Connection without collapse.

Every relationship has a type. Every interpretation can lead back to its origin.

RELATIONSHIP INSPECTOR

LINK TYPE

Inferred - not attested

EVIDENCE STATUS

The relationship is presented as an interpretation, not as a verified historical claim.

VIEW SOURCE CHAIN ->

04 / RESPECT

A boundary is *an act of care.*

A collection is not an invitation to access everything. Some records have public notices; others must remain undiscoverable.

CULTURAL AUTHORITY PRECEDES CURIOSITY

STATE A / RESTRICTED WITH AUTHORIZED NOTICE

This material is not available for public access.

Only disclosure explicitly authorized by the rights authority should appear here.

STATE B / UNDISCOVERABLE RECORD

NO RECORD OBJECT RENDERED

No title, description, or inferable metadata.

EDITORIAL / SERIF

Listen with care.

TYPE ROLES + SPACING, NOT SPECIFIC FONT MANDATES

INTERFACE / SANS

SOURCES. CONTEXT. CONSENT.

A restrained interface stays legible for decades.

EXPLORE THE MEMORY PROJECT

FROM CONCEPT TO CODE

Build the grammar before the spectacle.

PROOF A

ORIGIN

Narrative experience

Purposeful opening; compelling with no motion.

PROOF B

RECORD

Working archival UI

Clear source, context, provenance and access.

PROOF C

BOUNDARY

Stewardship behavior

Restricted states grounded in real controls.

SHIP: Repo audit + real code + mobile previews + reduced-motion behavior + accessibility checks + measured build/test results.

DO NOT SHIP: A Canopii clone. Invented testimony. Cosmetic consent. An inaccessible animation demo.
